Jump-Start Your Career In The Classroom

The Academy partners with industry-leading companies and manufacturers such as GM, Adidas, Jeep, Hasbro, Audi, Pininfarina, Jaguar, NASA, Camelbak, and Volvo, to offer our students exposure to working professionals and to create valuable networking opportunities.

In our cross-disciplinary collaborative classes, you'll work on real-world, industry-supplied design briefs to create concepts for your industry sponsor. You'll have the opportunity to work with corporate and agency professionals in small collaborative teams. These classes are designed to maximize individual recognition, build portfolios, and create employment opportunities for you and your fellow students.

Your Future Begins Today

Don't wait; connect with an admissions representative today and join us at the Academy—on campus or online—for a creative education unlike any other.

Transfer To Academy Of Art University Today

Are you passionate about art and design and looking to turn that passion into a career? If you want to build your professional portfolio and gain the skills needed for success, it's time to transfer to the Academy.

Our "No Barriers" policy makes it easy for transfer students to join us at any point in their college journey. No matter where you are in your studies, we welcome you to join us and explore your artistic potential. At the Academy, you'll experience hands-on, project-based learning that blends art and design technology like AI with essential artistic principles.

Design Your Own Creative Future

Our flexible on-campus, online, and virtual classes are designed to fit your lifestyle. Transferring to the Academy is easy:

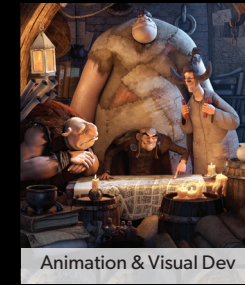

- There are NO portfolio requirements to transfer
- There are NO test score or grade requirements to transfer
- You do NOT have to be in San Francisco to study with us; we offer two distinct online modalities for attending the Academy remotely
- We are a portfolio-focused university; you will graduate with a professional-level, career-ready portfolio of work
- We offer industry collaboration opportunities that can give you a leg up when seeking employment in your chosen field
- Our classes are taught by working professionals employed in the disciplines they teach
- 14 STEM programs (25+ degrees) offer international students the opportunity to enroll in three years of Optional Practical Training (OPT) after graduation
