

UNLOCKING POTENTIAL

CULTURALLY RELEVANT PEDAGOGY IN MATH & SCIENCE

A COMMUNITY OF PRACTICE

Fostering Engagement, Equity, and Excellence in STEM for All Learners

This course is designed to train faculty, especially in STEM, on the principles and practical tools of Culturally Relevant Pedagogy (CRP). Approaches are applicable across all disciplines. You will come away with strategies to make math, science, and related subjects more accessible, engaging, and meaningful for all students, with a particular focus on Latina/o/x students. Leverage students' "funds of knowledge" to create learning environments where students see themselves as capable scholars, scientists, and mathematicians.

IN-PERSON DATES

August 12
August 14
